

Carbon Reduction Plan

Supplier name: **SynApps Solutions Limited**

Publication date: **October 2024**

Commitment to achieving Net Zero

SynApps Solutions Limited is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
Information gathered includes all Scope 1, 2, and 3 emissions from all business undertakings and the Company's remote working format and calculated with the aid of Carbon Footprint Limited using DEFRA and other internationally recognised metrics taking account of office premises, home offices, and business travel:	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	2.21
Scope 2	8.84
Scope 3 (Included Sources)	65.65
Total Emissions	76.70

Current Emissions Reporting

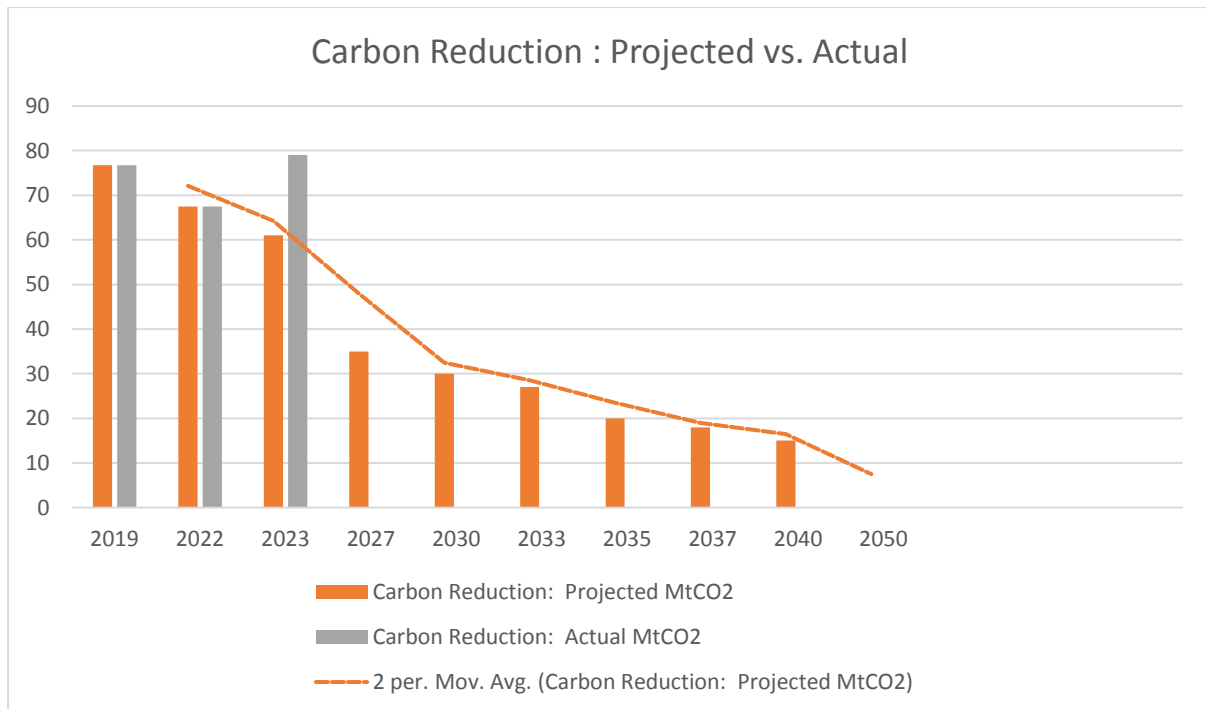

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1.40
Scope 2	5.50
Scope 3 (Included Sources)	72.10
Total Emissions	79.00

Emission reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next seven years to 30 tCO₂e by 2030. This is a reduction of 62%

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction projections to be achieved by 2030 equates to 30 tCO₂e, a 62%age reduction against the 2023 actual emissions. In the future we hope to implement further measures such as:

All staff and contractors are required to be trained, compliant, and tested against the Standard. Further instruction and testing will take place at regular intervals.

Reduction and offset of all carbon emissions due to travel by utilisation of carbon offset transport links and increased usage of collaborative facilities such as Microsoft Teams.

Encourage the use of environmentally friendly transport such as electric vehicles; promote walking and cycling alternatives.

Investment in local community group environmental initiatives

The Company will strive to offset carbon emissions by supporting a Global Portfolio of Verified Carbon Reduction Projects via a recognised program provider.

SynApps Solutions Limited achieved ISO 14001 certification on 2nd August 2022

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and approved by the Board of Directors.

Signed on behalf of the Board:
